

Policy: Facility Partnership

It is the policy of the Superior North Catholic District School Board to ensure the efficient and cost effective operation of the system. The Board shall work with its community partners in order to share its facilities to the benefit of the Board, its students and the community, and to optimize the use of the assets owned by the Board. The Board will seek opportunities to share facilities with community partners when building new schools and undertaking significant renovations, and when considering the use of unoccupied space in schools. The Board will attempt to expand the number of partnerships in a way that is transparent, sustainable and supportive of student achievement.
