RELIGIOUS EDUCATION

The Superior North Catholic District School Board focuses on nurturing the whole person: body, mind and soul, within the development of one's individual giftedness and relationship with God. The elementary Catholic School is dedicated to providing a distinctly Catholic Education ensuring that all curriculum is infused with Gospel values and serves to develop the faith life of all members of our school communities. The Board educates in partnership with the home, parish and community as a means of developing learners who can contribute in a positive manner to their school and church communities.

The Superior North Catholic District School Board is providing the opportunity for secondary students to gain a High School Credit with the following course:

Grade 9 (Open) - BE WITH ME: This course invites students into a conversation between their own journey and the story of the Christian community. With eyes of faith, students will gaze through a lens filtered by scripture, Christian moral development, prayer and family life in order to examine the attitudes and actions that characterize the Christian life, particularly in the areas of interpersonal relationships and sexuality. Students develop their understanding of Gospel values while actively engaging in a variety of challenging educational activities.

If you want more information about this course, please contact your local Catholic elementary school principal.

Catholic Education is founded in our belief in a loving and compassionate Creator. It is important that the student who attends a Catholic School is taught about and has the opportunity to develop his/her relationship with God. This is essential to the educational process.

Catholic Education informs the learner that the basis of self-worth is rooted in the fact that all persons are children of God. Human dignity and worth are not determined by wealth, power, or social prestige but by God's constant love for us. It is the desire of the Superior North Catholic school system to continue their education at the high school level.
